Organize your time. Rewards that add up.

DayMarck helps you manage appointments, calendar, to-do lists, reminders, notes and photos. It can be installed from the website on iPhone and Android. Price: $9.89 one-time, no mandatory subscription.

ACCUMULATING REWARDS, WITH NO PRESET CAP

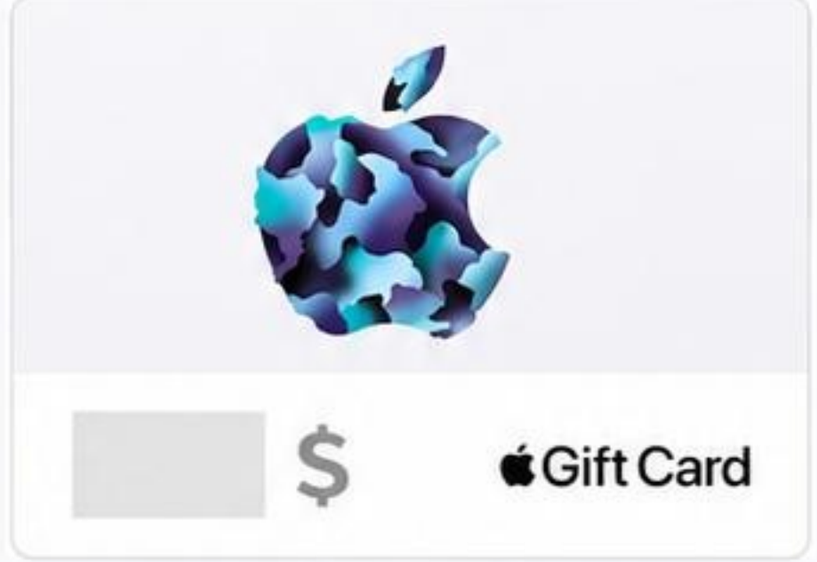

For every 10 new friends with a valid purchase, you earn $10 in reward credit. The rule repeats for each additional group of 10: you can keep accumulating rewards even after 100, 500 or 1,000 friends. There is no general accumulation limit, subject to the program rules. Any unused credit remains available for future rewards, according to the rules.

Choose your preferred Gift Card

AMAZON.COM

From $10

APPLE

From $10

For U.S. users, available reward gift cards are Amazon.com and Apple. In Europe, the catalog may also include Zalando, depending on availability.

How it works

1. Buy and activate DayMarck for $9.89.
2. Get your personal referral link and share it with your contacts.
3. Every group of 10 valid purchases through your link adds $10 to your reward credit.
4. Accumulate credit or choose the available Gift Card you prefer.
5. Request your reward in the Referral section: after verification, it is purchased and sent by email.

Discover the app: www.daymarck.tech

The more friends buy, the more rewards you can earn.

Examples of reward credit earned over time

Valid paying friends	Reward credit earned
10	$10
20	$20
30	$30
50	$50
100	$100
250	$250
500	$500
1,000	$1,000
2,000	$2,000

This table contains only examples: the program does not stop at 2,000 friends. Each new group of 10 valid purchases continues to generate $10 in reward credit, according to the program rules.

You can accumulate or redeem whenever you want

With 30 valid purchases, you have earned $30. You can request one Apple Gift Card for $25 and keep $5, or three $10 Gift Cards from Amazon.com. You can also keep your balance to request more gift cards later. Every new milestone adds credit to your available balance.

How to receive rewards

In the Referral section → My rewards, you will find your balance and the available Gift Cards. Choose a reward, confirm the request and wait for the delivery email. The administrator receives your choice, verifies the requirements, purchases the gift card and sends it: this is not an instant delivery.

Important information

Reward credit is not money: it cannot be withdrawn or converted into cash. The amounts shown are examples of potential credit, not guaranteed earnings. Only confirmed and valid purchases count; refunds, cancellations and fraud do not generate rewards. Credit expires 24 months after it becomes available (see page 3). Other conditions, available Gift Cards and delivery times are set by the program rules.

For U.S. users, the available reward Gift Cards are Amazon.com and Apple. In Europe, the catalog may also include Zalando, depending on availability.

Amazon and Apple do not sponsor or organize the DayMarck program. Their trademarks belong to their respective owners. Activation of the program is subject to verification of applicable legal requirements.

THE REWARD REPEATS: 10 friends = $10; another 10 friends = another $10, and so on. It is not a one-time reward.

Reward credit expiry

Valid for 2 years

Each portion of reward credit is valid for 24 months (2 years) from the date it becomes available, i.e. after the 15-day verification. Credit not used within 24 months expires and is lost.

How it works

• The oldest credit, i.e. the one closest to expiry, is always used first.

• Credit already requested (reserved) does not expire. If a request is cancelled, the credit becomes available again with its original expiry date.

• The expiry of each portion is always shown in Referral → My rewards, with a reminder.

Example: $10 earned on March 1, 2026 must be used by March 1, 2028.

Reminders and consent

To take part you accept the expiry rule directly in the app. Every 6 months you receive reminders that you confirm by ticking SEEN (VISIONATO).

If you withdraw your consent to the expiry rule you lose all accumulated credit and any right to future rewards and referrals, and your referral link is deactivated.

Reward credit is not money and is not refundable. The program rules, available in Referral → My rewards, prevail.
